Interval-Censored Time-to-Event Data: Methods and Applications (Chapman & Hall/CRC Biostatistics Series)

Interval-Censored Time-to-Event Data: Methods and Applications (Chapman & Hall/CRC Biostatistics Series)

Interval-Censored Time-to-Event Data: Methods and Applications collects the most recent techniques, models, and computational tools for interval-censored time-to-event data. Top biostatisticians from academia, biopharmaceutical industries, and government agencies discuss how these advances are impacting clinical trials and biomedical research.

Divided into three parts, the book begins with an overview of interval-censored data modeling, including nonparametric estimation, survival functions, regression analysis, multivariate data analysis, competing risks analysis, and other models for interval-censored data. The next part presents interval-censored methods for current status data, Bayesian semiparametric regression analysis of interval-censored data with monotone splines, Bayesian inferential models for interval-censored data, an estimator for identifying causal effect of treatment, and consistent variance estimation for interval-censored data. In the final part, the contributors use Monte Carlo simulation to assess biases in progression-free survival analysis as well as correct bias in interval-censored time-to-event applications. They also present adaptive decision making methods to optimize the rapid treatment of stroke, explore practical issues in using weighted logrank tests, and describe how to use two R packages.

A practical guide for biomedical researchers, clinicians, biostatisticians, and graduate students in biostatistics, this volume covers the latest developments in the analysis and modeling of interval-censored time-to-event data. It shows how up-to-date statistical methods are used in biopharmaceutical and public health applications.

From reader reviews:

Nancy Farley:

The book Interval-Censored Time-to-Event Data: Methods and Applications (Chapman & Hall/CRC Biostatistics Series) make one feel enjoy for your spare time. You can use to make your capable a lot more increase. Book can to become your best friend when you getting pressure or having big problem together with your subject. If you can make examining a book Interval-Censored Time-to-Event Data: Methods and Applications (Chapman & Hall/CRC Biostatistics Series) being your habit, you can get much more advantages, like add your current capable, increase your knowledge about a few or all subjects. You are able to know everything if you like open and read a e-book Interval-Censored Time-to-Event Data: Methods and Applications (Chapman & Hall/CRC Biostatistics Series). Kinds of book are a lot of. It means that, science reserve or encyclopedia or other folks. So , how do you think about this book?

Ross Adams:

Book is to be different for each grade. Book for children until finally adult are different content. To be sure that book is very important normally. The book Interval-Censored Time-to-Event Data: Methods and Applications (Chapman & Hall/CRC Biostatistics Series) was making you to know about other knowledge and of course you can take more information. It is quite advantages for you. The publication Interval-Censored Time-to-Event Data: Methods and Applications (Chapman & Hall/CRC Biostatistics Series) is not only giving you much more new information but also being your friend when you truly feel bored. You can spend your own personal spend time to read your e-book. Try to make relationship with the book Interval-Censored Time-to-Event Data: Methods and Applications (Chapman & Hall/CRC Biostatistics Series). You never really feel lose out for everything in the event you read some books.

Michelle Favors:

As people who live in often the modest era should be update about what going on or details even knowledge to make all of them keep up with the era which is always change and advance. Some of you maybe will certainly update themselves by examining books. It is a good choice for you personally but the problems coming to you actually is you don't know which you should start with. This Interval-Censored Time-to-Event Data: Methods and Applications (Chapman & Hall/CRC Biostatistics Series) is our recommendation to make you keep up with the world. Why, as this book serves what you want and want in this era.

Ellen Scherer:

That e-book can make you to feel relax. This kind of book Interval-Censored Time-to-Event Data: Methods and Applications (Chapman & Hall/CRC Biostatistics Series) was bright colored and of course has pictures on there. As we know that book Interval-Censored Time-to-Event Data: Methods and Applications (Chapman & Hall/CRC Biostatistics Series) has many kinds or variety. Start from kids until teens. For example Naruto or Private investigator Conan you can read and believe that you are the character on there.

Therefore , not at all of book tend to be make you bored, any it offers up you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading which.
