A Miracle in Reading: Intensive At-Home Remedial Reading Program Valerie Arredondo

Have you ever thought, “It will take a miracle to get this child to read!” A Miracle in Reading is an at-home reading tutoring program. This book (Green Level) contains the parent manual and all of the student consumables for level A, B, C and D. These books can also be purchased separately. This book is almost 500 pages in length and many of the pages are full color. This program was designed to be used by parents to give their children high-quality remedial reading instruction such as you would typically find in an expensive tutoring center, but at a fraction of the cost. This program can be used by any child, but will be especially helpful for children who have a reading disability or dyslexia, children who struggle with traditional workbook, pencil or writing approaches to learning, and children who learn by moving and touching (kinesthetic and tactile learners). This program can be used as a stand-alone reading program, or as an addition to another reading program. It was written for Christian homeschoolers and for parents who want to tutor their children at home. Why does this program work? A Miracle in Reading uses techniques that are research-based and have been found to be the most effective methods in teaching children with learning disabilities and dyslexia to read. These learning techniques help to stimulate your child’s brain and are specially designed to help your child to learn and retain information.
