Neuroepistemology Yuri Zambrano

The Epistemologic study of the mind-mind problem (Mind-brain / ToM) and conscious cognition, can apply the "Theory of Neuronal Epistemology" (TNE) based on backpropagation of specific neural networks. For operating in functionalist terms and in a cognitive way, the TNE is supported by a connectionist model holding the algorithmic equation that includes probabilistic features, spatiotemporal units, computational components and fractal-geometric-tensorial variables. The main arguments of the TNE deal with the study of diverse neuronal lineages and their sophisticated specialization (Neuronalism and the "neurons knowledge"). A second argument is the "Protein Epistem" determining this specialization degree, and the third is associated with connectionism. The essential unit of the TNE formula is the Fractal Coincidental Pattern (FCP) used for evaluating the multiple-vectorial probabilities of this "small world" during the quantal release of neurotransmitters.

From reader reviews:

Christopher Hairston:

Why don't make it to be your habit? Right now, try to ready your time to do the important behave, like looking for your favorite e-book and reading a publication. Beside you can solve your condition; you can add your knowledge by the guide entitled Neuroepistemology. Try to make book Neuroepistemology as your buddy. It means that it can for being your friend when you really feel alone and beside that course make you smarter than in the past. Yeah, it is very fortunated for yourself. The book makes you much more confidence because you can know anything by the book. So , let us make new experience and also knowledge with this book.

Benjamin Holmes:

The actual book Neuroepistemology has a lot associated with on it. So when you check out this book you can get a lot of profit. The book was written by the very famous author. This articles author makes some research previous to write this book. This book very easy to read you can get the point easily after reading this book.

Michelle Saunders:

As we know that book is essential thing to add our know-how for everything. By a reserve we can know everything we want. A book is a group of written, printed, illustrated or perhaps blank sheet. Every year was exactly added. This guide Neuroepistemology was filled with regards to science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has diverse feel when they reading the book. If you know how big advantage of a book, you can truly feel enjoy to read a guide. In the modern era like now, many ways to get book which you wanted.

Veda Howard:

As a scholar exactly feel bored to be able to reading. If their teacher expected them to go to the library in order to make summary for some reserve, they are complained. Just little students that has reading's soul or real their hobby. They just do what the educator want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that reading is not important, boring in addition to can't see colorful photos on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Neuroepistemology can make you truly feel more interested to read.
