Nuclear Medicine and PET/CT Technology and Techniques, 6e Paul E. Christian BS CNMT PET FSNMTS, Kristen M. Waterstram-Rich MS CNMT NCT FSNMTS

For more than two decades, this text has succinctly presented the procedures and technologies related to an ever-changing specialty. This 6th edition continues that tradition by providing a general update of all chapters, a new chapter on CT physics and instrumentation, and a revised focus to the increasingly important PET/CT systems. All aspects of nuclear medicine are explored, with a focus on pertinent anatomy and physiology and a discussion of each procedure in relation to the specific use of radiopharmaceuticals and instruments required.

- Foundation chapters cover basic math, statistics, physics instrumentation, computers, lab science, radiochemistry and pharmacology, allowing the user to understand how and why procedures are performed.
- High-profile editors and contributors come from a variety of educational and clinical settings, making this an authoritative and comprehensive resource.
- In-depth procedure discussions provide practical information relevant to clinical practice.
- Accessible writing style and approach to basic science subjects makes topics understandable, progressing from fundamentals to more complex concepts.
- A glossary provides definitions of specialized terminology and all important concepts.
- The focus changes from PET to combined PET/CT, with two chapters covering this topic in detail.
- New CT Physics and Instrumentation chapter provides the fundamentals of PET/CT studies.
- Significantly rewritten chapters include Radiation Safety in Nuclear Medicine, Skeletal System, and Inflammatory/Tumor Imaging and Therapy.
- Color insert is expanded to 8 pages to include clear, full-color PET/CT scans.
- 40 practice problems are included in the chapter on math and statistics, twice as many as before, with answers in the back of the book.
- Reader-friendly features include key terms, chapter outlines, and learning objectives. Suggested readings are also included throughout the book.
- A reference table of radionuclides used in nuclear medicine and PET is added to the appendix.

From reader reviews:

Arielle Griffin:

Nowadays reading books be than want or need but also get a life style. This reading addiction give you lot of advantages. The advantages you got of course the knowledge the actual information inside the book in which improve your knowledge and information. The details you get based on what kind of book you read, if you want send more knowledge just go with knowledge books but if you want feel happy read one having theme for entertaining including comic or novel. The particular Nuclear Medicine and PET/CT Technology and Techniques, 6e is kind of e-book which is giving the reader unpredictable experience.

Patricia Frazier:

Playing with family within a park, coming to see the ocean world or hanging out with close friends is thing that usually you will have done when you have spare time, after that why you don't try point that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Nuclear Medicine and PET/CT Technology and Techniques, 6e, you can enjoy both. It is fine combination right, you still would like to miss it? What kind of hangout type is it? Oh occur its mind hangout people. What? Still don't obtain it, oh come on its called reading friends.

George Rodriguez:

Many people spending their time frame by playing outside along with friends, fun activity having family or just watching TV the entire day. You can have new activity to shell out your whole day by examining a book. Ugh, you think reading a book can really hard because you have to take the book everywhere? It all right you can have the e-book, having everywhere you want in your Mobile phone. Like Nuclear Medicine and PET/CT Technology and Techniques, 6e which is getting the e-book version. So , try out this book? Let's see.

Flor Rieke:

A lot of people said that they feel fed up when they reading a book. They are directly felt the idea when they get a half areas of the book. You can choose the book Nuclear Medicine and PET/CT Technology and Techniques, 6e to make your current reading is interesting. Your skill of reading expertise is developing when you just like reading. Try to choose very simple book to make you enjoy to see it and mingle the impression about book and reading through especially. It is to be 1st opinion for you to like to open a book and study it. Beside that the e-book Nuclear Medicine and PET/CT Technology and Techniques, 6e can to be your friend when you're truly feel alone and confuse using what must you're doing of these time.
