**Fundamentals of Spacecraft Attitude Determination and Control (Space Technology Library)** F. Landis Markley, John L. Crassidis

This book explores topics that are central to the field of spacecraft attitude determination and control. The authors provide rigorous theoretical derivations of significant algorithms accompanied by a generous amount of qualitative discussions of the subject matter. The book documents the development of the important concepts and methods in a manner accessible to practicing engineers, graduate-level engineering students and applied mathematicians. It includes detailed examples from actual mission designs to help ease the transition from theory to practice and also provides prototype algorithms that are readily available on the author's website.

Subject matter includes both theoretical derivations and practical implementation of spacecraft attitude determination and control systems. It provides detailed derivations for attitude kinematics and dynamics and provides detailed description of the most widely used attitude parameterization, the quaternion. This title also provides a thorough treatise of attitude dynamics including Jacobian elliptical functions. It is the first known book to provide detailed derivations and explanations of state attitude determination and gives readers real-world examples from actual working spacecraft missions. The subject matter is chosen to fill the void of existing textbooks and treatises, especially in state and dynamics attitude determination. MATLAB code of all examples will be provided through an external website.

### **From reader reviews:**

#### **Herman Lewis:**

Throughout other case, little folks like to read book Fundamentals of Spacecraft Attitude Determination and Control (Space Technology Library). You can choose the best book if you like reading a book. Provided that we know about how is important a new book Fundamentals of Spacecraft Attitude Determination and Control (Space Technology Library). You can add knowledge and of course you can around the world by the book. Absolutely right, since from book you can recognize everything! From your country till foreign or abroad you can be known. About simple point until wonderful thing it is possible to know that. In this era, we are able to open a book or even searching by internet unit. It is called e-book. You need to use it when you feel uninterested to go to the library. Let's study.

#### **Chris Gibbons:**

Now a day people who Living in the era exactly where everything reachable by match the internet and the resources within it can be true or not require people to be aware of each info they get. How many people to be smart in getting any information nowadays? Of course the solution is reading a book. Looking at a book can help individuals out of this uncertainty Information mainly this Fundamentals of Spacecraft Attitude Determination and Control (Space Technology Library) book since this book offers you rich details and knowledge. Of course the information in this book hundred per cent guarantees there is no doubt in it you probably know this.

#### **David Trudeau:**

Your reading 6th sense will not betray anyone, why because this Fundamentals of Spacecraft Attitude Determination and Control (Space Technology Library) publication written by well-known writer we are excited for well how to make book that can be understand by anyone who also read the book. Written in good manner for you, still dripping wet every ideas and creating skill only for eliminate your hunger then you still uncertainty Fundamentals of Spacecraft Attitude Determination and Control (Space Technology Library) as good book not just by the cover but also with the content. This is one e-book that can break don't evaluate book by its handle, so do you still needing a different sixth sense to pick this kind of!? Oh come on your examining sixth sense already told you so why you have to listening to a different sixth sense.

#### **David Auman:**

Reading a book make you to get more knowledge from it. You can take knowledge and information coming from a book. Book is composed or printed or descriptive from each source this filled update of news. In this modern era like now, many ways to get information are available for an individual. From media social just like newspaper, magazines, science reserve, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just in search of the Fundamentals of Spacecraft Attitude Determination and Control (Space Technology Library) when you

desired it?
