Integrated Product and Process Design and Development: The Product Realization Process (Environmental & Energy Engineering) Edward B. Magrab

The Integrated Product and Process Design and Development (IP2D2) method is quickly becoming the new standard for the rapid creation of competitively priced, high-quality products. IP2D2 indicates, in the broadest sense, the overlapping, interacting, and iterative nature of all of the aspects of the product realization process. The method is a continuous process whereby a product's cost, performance and features, value, and time-to-market lead to a company's increased profitability and market share. This new text/reference reflects the sweeping changes this approach has brought to traditional engineering design courses and to industry.

Carefully organized, with sections on each major stage of the approach, Integrated Product and Process Design and Development: The Product Realization Process is the first complete treatment of this new direction in engineering. The book is designed to help you cultivate an attitude toward design that encourages creativity and innovation, while considering the equally important considerations of customer requirements and satisfaction, quality, reliability, manufacturing methods and material selection, assembly, cost, the environment, and scheduling. Extensively class tested in senior- and graduate-level engineering design courses at the University of Maryland, the book gives equal time to conceptual and practical aspects. As each concept is introduced and explained, two book-long examples provide you with a realistic sense of how a product's creation progresses through its various stages. Numerous checklists and other practical guidelines help you learn to apply the IP2D2 method to your own work.

Students and newly graduated engineers will appreciate the modern perspective that more nearly reflects what they will encounter in practice than what is obtainable in traditional texts. For more experienced practicing engineers, this is the new information they need to keep up with recent rapid changes and stay marketable today and in the future.

From reader reviews:

Roy Myers:

What do you ponder on book? It is just for students since they are still students or it for all people in the world, exactly what the best subject for that? Only you can be answered for that question above. Every person has distinct personality and hobby for each other. Don't to be pressured someone or something that they don't need do that. You must know how great and important the book Integrated Product and Process Design and Development: The Product Realization Process (Environmental & Energy Engineering). All type of book could you see on many resources. You can look for the internet sources or other social media.

Brent Jones:

Information is provisions for people to get better life, information presently can get by anyone with everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider any time those information which is inside former life are hard to be find than now is taking seriously which one is acceptable to believe or which one the actual resource are convinced. If you receive the unstable resource then you get it as your main information you will see huge disadvantage for you. All of those possibilities will not happen within you if you take Integrated Product and Process Design and Development: The Product Realization Process (Environmental & Energy Engineering) as your daily resource information.

Anna Gann:

The book untitled Integrated Product and Process Design and Development: The Product Realization Process (Environmental & Energy Engineering) contain a lot of information on that. The writer explains the girl idea with easy means. The language is very simple to implement all the people, so do definitely not worry, you can easy to read that. The book was compiled by famous author. The author will bring you in the new time of literary works. You can actually read this book because you can continue reading your smart phone, or product, so you can read the book in anywhere and anytime. If you want to buy the e-book, you can available their official web-site and order it. Have a nice study.

Sharon Grace:

As we know that book is vital thing to add our know-how for everything. By a publication we can know everything we wish. A book is a group of written, printed, illustrated or even blank sheet. Every year was exactly added. This e-book Integrated Product and Process Design and Development: The Product Realization Process (Environmental & Energy Engineering) was filled with regards to science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has diverse feel when they reading a new book. If you know how big benefit of a book, you can sense enjoy to read a guide. In the modern era like currently, many ways to get book that you simply wanted.
