The First Decade of Living with the Global Crisis: Economic and Social Developments in the Balkans and Eastern Europe (Contributions to Economics)

This volume sheds new light on economic developments in several countries of Southeast Europe. The European Union and especially the eurozone continue to experience rhythms of fiscal crisis, as can most clearly be seen in the debt crisis in the South Periphery. Despite the fact that several measures and decisions have been taken to deal with the crisis (banking union, liquidity support from the European Central Bank), proposals to reform Europe's strategic policy in order to find a way out of the crisis have been put forward.

This book explores the respective roles that specific sectors, e.g. the agricultural sector, social capital, tax policies and labour immigration, can play in this regard. The importance of international economic relations (exports, imports, FDI, exchange rates) is analysed, in order to illustrate the nature of the economic developments and the major economic difficulties these countries face.
