A Solution Manual and Notes for: Puzzles to Puzzle You by Devi Shakuntala John Weatherwax

This is a great little puzzle book to develop the skills for problem solving. It was written by the genius Shakuntala in 1979. When the book was published computers were not as common as they are now and (in my opinion) it would be very difficult to solve some of these problems ``by hand". This was apparently not a problem for Shakuntala, who has been described as a human calculator. This description shows in these problems. In fact many of the problems have a feel like ``Project Euler" problems in that some of them can be solved (without as much tedium) by using a programming language to enumerate the very large number of possible candidates. In fact I would estimate that for these problems most people would simply give up before being able to find a solution. This is a shame since in my view solving problems should be an enterprise where we ``use everything we've got" in an attempt at a solution. By introducing a modern computer we are able to offload some of the work to a machine and get back to the fun part of problem solving. Working on the ``computational" problems in this book are so much like the Project Euler problems that studying this book can give you some techniques to be used there.

In this book I provide up-to date detailed solutions to many of the problems posed by Shakuntala. In addition, in the case where it is prudent to do so I implement python (and sometimes R) codes to help in the enumeration of the choices and facilitate finding solutions. Reading these notes and solutions is a good way to learn a bit about the very popular and powerful programming language python. I hope that this book will help you become a stronger problem solver and open your eyes to the possibility of using { t python} as a language to help solve your own problems.

Patricia Howland:

As a university student exactly feel bored to be able to reading. If their teacher asked them to go to the library or even make summary for some reserve, they are complained. Just small students that has reading's internal or real their leisure activity. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that looking at is not important, boring and also can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever you want. Likewise word says, many

ways to reach Chinese's country. Therefore this A Solution Manual and Notes for: Puzzles to Puzzle You by Devi Shakuntala can make you truly feel more interested to read.
