DNA Fingerprinting in Plants and Fungi Kurt Weising, Hilde Nybom, Markus Pfenninger, Kirsten Wolff, Wieland Meyer

This exciting new book describes the use of DNA fingerprinting and its application in a wide area of plant and fungal research. It presents a thorough theoretical introduction to DNA fingerprinting, the practical aspects of extraction of DNA from the plant or fungus under study, and the statistical analysis of the data. An overview presents all species to which DNA fingerprinting is currently being applied and highlights many future technical developments.
