The Law and Policy of the World Trade Organization: Text, Cases and Materials Professor Peter Van den Bossche, Werner Zdouc

Since its first edition, this textbook has been the first choice of teachers and students alike, due to its clear introduction to the basic principles of the multilateral trading system and its detailed examination of the law of the World Trade Organization. The third edition continues to explore the institutional and substantive law of the WTO. Material has been restructured to closely align with teaching approaches making it even more user-friendly. It has been updated to incorporate all new developments in the WTO's body of case law. Questions and assignments are integrated to allow students to assess their understanding, while chapter summaries reinforce learning. Chapters end with an exercise reflecting real-life trade problems: these challenge students (and practitioners) and enable them to hone their analytical skills. This title is an essential tool for all WTO law students and will also serve as the practitioner's introductory guide to the WTO.
