Calculus by and for young people: (ages 7, yes 7 and up) Donald Cohen

This is an amazing book (3 3/4" x 5")! It was written to share with parents, teachers, teachers of teachers, and learners of all ages- the problems that Don, his students, Archimedes and Newton, worked on. The interesting thing about Don's book is that it shows how to look for and find **patterns**, that makes much more sense to the study of graphs, functions, solving equations, infinite series, infinite sequences, Fibonacci numbers, derivatives and integrals. He uses hands-on materials to do much of this, for all ages of learners, and has fun doing it.

This book was reviewed in the Dec. '88 issue of *Scientific American* and Mary Pride's *The Big Book of Home Learning* among many others. The Japanese translation of this book has sold well in bookstores throughout Japan. This CD-ROM gives all computer users, young and old, the ability to take on the study of some important mathematics, and enjoy it!
