Molecular Diagnostics and Treatment of Pancreatic Cancer: Systems and Network Biology Approaches Asfar Azmi

Molecular Diagnostics and Treatment of Pancreatic Cancer describes the different emerging applications of systems biology and how it is shaping modern pancreatic cancer research. This book begins by introducing the current state of the art knowledge, trends in diagnostics, progress in disease model systems as well as new treatment and palliative care strategies in pancreatic cancer. Specific sections are dedicated to enlighten the readers to newer discoveries that have emerged from gene expression profiling, proteomics, metabolomics and systems level analyses of pancreatic cancer datasets. First of a kind and novel network strategies to understand oncogenic Kras signaling in pancreatic tumors are presented. The attempts to computationally model and prioritize microRNAs that cause pancreatic cancer resistance are also highlighted.

Addressing this important area, *Molecular Diagnostics and Treatment of Pancreatic Cancer* provides insights into important network evaluation methodologies related to pancreatic cancer related microRNAs targetome. There are dedicated chapters on critical aspects of the evolving yet controversial field of pancreatic cancer stems cells. The work concludes by discussing the applications of network sciences in pancreatic cancer drug discovery and clinical trial design.

- Encompasses discussion of innovative tools including expression signatures in cell lines, 3D models, animal xenograft models, primary models and patient derived samples, aiding subversion of traditional biology paradigms, and enhancing comprehension across conventional length and temporal scales
- Coverage includes novel applications in targeted drugs, polypharmacology, network pharmacology and other related drug development arenas - helping researchers in pancreatic cancer drug discovery
- Summarizes many relevant computational and clinical references from fast-evolving literature
- Comprehensive glossary helps newer readers understand technical terms and specialized nomenclature

From reader reviews:

Daisy Richardson:

In other case, little folks like to read book Molecular Diagnostics and Treatment of Pancreatic Cancer: Systems and Network Biology Approaches. You can choose the best book if you'd prefer reading a book. As long as we know about how is important a new book Molecular Diagnostics and Treatment of Pancreatic Cancer: Systems and Network Biology Approaches. You can add expertise and of course you can around the world by way of a book. Absolutely right, mainly because from book you can know everything! From your country right up until foreign or abroad you will end up known. About simple thing until wonderful thing you can know that. In this era, we are able to open a book or maybe searching by internet unit. It is called e-book. You can use it when you feel bored to go to the library. Let's examine.

Catherine Poppe:

Nowadays reading books are more than want or need but also turn into a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge your information inside the book that improve your knowledge and information. The knowledge you get based on what kind of e-book you read, if you want attract knowledge just go with schooling books but if you want experience happy read one using theme for entertaining such as comic or novel. Often the Molecular Diagnostics and Treatment of Pancreatic Cancer: Systems and Network Biology Approaches is kind of book which is giving the reader unforeseen experience.

Robert Cobb:

The guide with title Molecular Diagnostics and Treatment of Pancreatic Cancer: Systems and Network Biology Approaches possesses a lot of information that you can understand it. You can get a lot of profit after read this book. This specific book exist new understanding the information that exist in this publication represented the condition of the world now. That is important to yo7u to learn how the improvement of the world. This book will bring you in new era of the glowbal growth. You can read the e-book on your own smart phone, so you can read the item anywhere you want.

Cara Fultz:

As a pupil exactly feel bored to help reading. If their teacher asked them to go to the library in order to make summary for some guide, they are complained. Just very little students that has reading's heart and soul or real their pastime. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading really. Any students feel that examining is not important, boring along with can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Molecular Diagnostics and Treatment of Pancreatic Cancer: Systems and Network Biology Approaches can make you really feel more interested to read.
