Linear Mixed Models for Longitudinal Data (Springer Series in Statistics)

Geert Verbeke, Geert Molenberghs

Linear Mixed Models for Longitudinal Data (Springer Series in Statistics) Geert Verbeke, Geert Molenberghs

This book provides a comprehensive treatment of linear mixed models for continuous longitudinal data. Next to model formulation, this edition puts major emphasis on exploratory data analysis for all aspects of the model, such as the marginal model, subject-specific profiles, and residual covariance structure. Further, model diagnostics and missing data receive extensive treatment. Sensitivity analysis for incomplete data is given a prominent place.

Most analyses were done with the MIXED procedure of the SAS software package, but the data analyses are presented in a software-independent fashion.

From reader reviews:

Christopher Clarke:

Information is provisions for those to get better life, information these days can get by anyone in everywhere. The information can be a understanding or any news even a concern. What people must be consider any time those information which is from the former life are challenging be find than now could be taking seriously which one is acceptable to believe or which one often the resource are convinced. If you find the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All those possibilities will not happen within you if you take Linear Mixed Models for Longitudinal Data (Springer Series in Statistics) as your daily resource information.

Sabra Fitzgerald:

In this era globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The condition of the world makes the information better to share. You can find a lot of personal references to get information example: internet, classifieds, book, and soon. You will see that now, a lot of publisher this print many kinds of book. The actual book that recommended to you personally is Linear Mixed Models for Longitudinal Data (Springer Series in Statistics) this e-book consist a lot of the information in the condition of this world now. This specific book was represented how do the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. The writer made some exploration when he makes this book. This is why this book acceptable all of you.

Amy Nichols:

Is it you who having spare time subsequently spend it whole day by watching television programs or just resting on the bed? Do you need something totally new? This Linear Mixed Models for Longitudinal Data (Springer Series in Statistics) can be the respond to, oh how comes? A fresh book you know. You are so out of date, spending your time by reading in this new era is common not a nerd activity. So what these publications have than the others?

Suk Barry:

As a scholar exactly feel bored to help reading. If their teacher requested them to go to the library or make summary for some book, they are complained. Just tiny students that has reading's spirit or real their pastime. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading critically. Any students feel that studying is not important, boring and also can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Linear Mixed Models for Longitudinal Data (Springer Series in Statistics) can make you feel more interested to read.
