MIMO Communication for Cellular Networks (Information Technology: Transmission, Processing and Storage)

Howard Huang, Constantinos B. Papadias, Sivarama Venkatesan

MIMO Communication for Cellular Networks (Information Technology: Transmission, Processing and Storage) Howard Huang, Constantinos B. Papadias, Sivarama Venkatesan

As the theoretical foundations of multiple-antenna techniques evolve and as these multiple-input multiple-output (MIMO) techniques become essential for providing high data rates in wireless systems, there is a growing need to understand the performance limits of MIMO in practical networks. To address this need, *MIMO Communication for Cellular Networks* presents a systematic description of MIMO technology classes and a framework for MIMO system design that takes into account the essential physical-layer features of practical cellular networks.

In contrast to works that focus on the theoretical performance of abstract MIMO channels, *MIMO Communication for Cellular Networks* emphasizes the practical performance of realistic MIMO systems. A unified set of system simulation results highlights relative performance gains of different MIMO techniques and provides insights into how best to use multiple antennas in cellular networks under various conditions.

MIMO Communication for Cellular Networks describes single-user, multiuser, network MIMO technologies and system-level aspects of cellular networks, including channel modeling, resource scheduling, interference mitigation, and simulation methodologies. The key concepts are presented with sufficient generality to be applied to a wide range of wireless systems, including those based on cellular standards such as LTE, LTE-Advanced, WiMAX, and WiMAX2. The book is intended for use by graduate students, researchers, and practicing engineers interested in the physical-layer design of state-of-the-art wireless systems.

From reader reviews:

Martha Doughty:

The book MIMO Communication for Cellular Networks (Information Technology: Transmission, Processing and Storage) make one feel enjoy for your spare time. You can utilize to make your capable far more increase. Book can to become your best friend when you getting pressure or having big problem with your subject. If you can make reading through a book MIMO Communication for Cellular Networks (Information Technology: Transmission, Processing and Storage) to be your habit, you can get much more advantages, like add your personal capable, increase your knowledge about several or all subjects. You may know everything if you like available and read a book MIMO Communication for Cellular Networks (Information Technology: Transmission, Processing and Storage). Kinds of book are several. It means that, science e-book or encyclopedia or other folks. So , how do you think about this reserve?

Katrina Frey:

In this 21st one hundred year, people become competitive in each and every way. By being competitive now, people have do something to make them survives, being in the middle of often the crowded place and notice by simply surrounding. One thing that often many people have underestimated this for a while is reading. Yeah, by reading a reserve your ability to survive increase then having chance to stay than other is high. For you who want to start reading a book, we give you this specific MIMO Communication for Cellular Networks (Information Technology: Transmission, Processing and Storage) book as beginning and daily reading publication. Why, because this book is more than just a book.

Larry Tatro:

Your reading 6th sense will not betray you actually, why because this MIMO Communication for Cellular Networks (Information Technology: Transmission, Processing and Storage) publication written by well-known writer who really knows well how to make book that could be understand by anyone who read the book. Written in good manner for you, still dripping wet every ideas and producing skill only for eliminate your personal hunger then you still doubt MIMO Communication for Cellular Networks (Information Technology: Transmission, Processing and Storage) as good book not just by the cover but also with the content. This is one reserve that can break don't determine book by its deal with, so do you still needing one more sixth sense to pick that!? Oh come on your looking at sixth sense already told you so why you have to listening to a different sixth sense.

Adam Carter:

Beside this specific MIMO Communication for Cellular Networks (Information Technology: Transmission, Processing and Storage) in your phone, it can give you a way to get more close to the new knowledge or info. The information and the knowledge you will got here is fresh through the oven so don't become worry

if you feel like an outdated people live in narrow small town. It is good thing to have MIMO Communication for Cellular Networks (Information Technology: Transmission, Processing and Storage) because this book offers for you readable information. Do you occasionally have book but you do not get what it's exactly about. Oh come on, that won't happen if you have this inside your hand. The Enjoyable set up here cannot be questionable, just like treasuring beautiful island. Use you still want to miss the item? Find this book and also read it from today!
