## Case Studies in Clinical Psychological Science: Bridging the Gap from Science to Practice

In the past few decades clinical science has emerged as a prominent model for training and practice in clinical psychology. This model emphasizes evidence derived from high-quality research and is consistent with the increasingly influential evidence-based movement in medicine, which is a vital step toward making psychotherapy more effective, efficient, and safe. Despite this trend, much current psychological practice is not evidence-based; moreover, there is a marked dearth of resources available to train students and assist practitioners with the challenging goal of translating science into practice.

*Case Studies in Clinical Psychological Science* demonstrates in detail how the clinical science model can be applied to actual cases. Edited by Professors William O'Donohue and Scott O. Lilienfeld, this book's unique structure presents dialogues between leading clinical researchers regarding the treatment of a wide variety of psychological problems, from depression and Alzheimer's disease to Panic Disorder and chronic pain. Chapters describe what evidence-based practice consists of for various clinical problems and are followed by commentary sections in which other leading clinical researchers analyze the case at hand, pointing out additional assessment and treatment options and controversial issues. The chapter authors then reply to the commentary in response sections. By examining the application of scientifically based interventions to actual cases and modeling thoughtful and collegial discussion among prominent clinical researchers, *Case Studies in Clinical Psychological Science* will assist students, practitioners, and clinical researchers with the crucial task of applying research evidence to psychotherapy and bridging the gap between science and practice.

#### **Randell Easley:**

The reason why? Because this Case Studies in Clinical Psychological Science: Bridging the Gap from Science to Practice is an unordinary book that the inside of the book waiting for you to snap the idea but latter it will distress you with the secret that inside. Reading this book next to it was fantastic author who have write the book in such remarkable way makes the content on the inside easier to understand, entertaining technique but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this ever again or you going to regret it. This phenomenal book will give you a lot of benefits than the other book have such as help improving your proficiency and your critical thinking way. So , still want to hesitate having that book? If I ended up you I will go to the guide store hurriedly.

#### **Scott Reisinger:**

As a student exactly feel bored to reading. If their teacher inquired them to go to the library as well as to make summary for some e-book, they are complained. Just minor students that has reading's heart and soul or real their hobby. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that reading through is not important, boring as well as can't see colorful photos on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this Case Studies in Clinical Psychological Science: Bridging the Gap from Science to Practice can make you sense more interested to read.
