Nursing Management of Diabetes Mellitus Diana W. Guthrie, Richard A. Guthrie

In this fifth edition...the authors and their stellar cast of contributing authors bring us to the present state of the science and art in diabetes...including today's exciting research and a glimpse into the ever-evolving future.

from the Foreword by Jane K. Kadohiro, DrPH, APRN, CDE
President, American Association of Diabetes Educators

This updated and revised fifth edition reflects the continuing progress in our understanding of diabetes and its care. Evidence of the importance of prevention measures, improvements in medication, early detection, and treatment of complications have evolved in the past few years, and this new edition addresses these changes. The book continues to provide nurses and other health professionals with the basics, including physiology, diagnosis, insulin and diet management, acute care, exercise, and life style issues. It includes complete guidelines on developing an education program, with a suggested course outline.
