Differential Equations: A Dynamical Systems Approach: Higher-Dimensional Systems (Texts in Applied Mathematics)

John H. Hubbard, Beverly H. West

Differential Equations: A Dynamical Systems Approach: Higher-Dimensional Systems (Texts in Applied Mathematics) John H. Hubbard, Beverly H. West

This is a continuation of the subject matter discussed in the first book, with an emphasis on systems of ordinary differential equations and will be most appropriate for upper level undergraduate and graduate students in the fields of mathematics, engineering, and applied mathematics, as well as in the life sciences, physics, and economics.

After an introduction, there follow chapters on systems of differential equations, of linear differential equations, and of nonlinear differential equations. The book continues with structural stability, bifurcations, and an appendix on linear algebra. The whole is rounded off with an appendix containing important theorems from parts I and II, as well as answers to selected problems.

From reader reviews:

Raymond Garza:

Do you have favorite book? When you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each e-book has different aim as well as goal; it means that reserve has different type. Some people feel enjoy to spend their the perfect time to read a book. They are really reading whatever they get because their hobby is actually reading a book. Think about the person who don't like reading a book? Sometime, individual feel need book after they found difficult problem as well as exercise. Well, probably you will need this Differential Equations: A Dynamical Systems Approach: Higher-Dimensional Systems (Texts in Applied Mathematics).

Sylvia Cunningham:

Spent a free time and energy to be fun activity to try and do! A lot of people spent their sparetime with their family, or their particular friends. Usually they doing activity like watching television, planning to beach, or picnic in the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your own personal free time/ holiday? May be reading a book could be option to fill your no cost time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to try look for book, may be the e-book untitled Differential Equations: A Dynamical Systems Approach: Higher-Dimensional Systems (Texts in Applied Mathematics) can be very good book to read. May be it is usually best activity to you.

Tammy Campbell:

Reading can called head hangout, why? Because if you are reading a book especially book entitled Differential Equations: A Dynamical Systems Approach: Higher-Dimensional Systems (Texts in Applied Mathematics) the mind will drift away trough every dimension, wandering in each aspect that maybe not known for but surely will become your mind friends. Imaging just about every word written in a publication then become one form conclusion and explanation in which maybe you never get ahead of. The Differential Equations: A Dynamical Systems Approach: Higher-Dimensional Systems (Texts in Applied Mathematics) giving you one more experience more than blown away the mind but also giving you useful info for your better life in this particular era. So now let us explain to you the relaxing pattern the following is your body and mind are going to be pleased when you are finished studying it, like winning an activity. Do you want to try this extraordinary shelling out spare time activity?

Lesley Dwyer:

Reading a e-book make you to get more knowledge from the jawhorse. You can take knowledge and information from a book. Book is published or printed or highlighted from each source in which filled update of news. With this modern era like today, many ways to get information are available for you. From media social including newspaper, magazines, science book, encyclopedia, reference book, novel and comic. You

can add your understanding by that book. Are you ready to spend your spare time to spread out your book?
Or just in search of the Differential Equations: A Dynamical Systems Approach: Higher-Dimensional
Systems (Texts in Applied Mathematics) when you desired it?
