Name Reactions: A Collection of Detailed Mechanism and Synthetic Applications (the fourth edition)/classic translated version (Chinese Edition) (mei) li

This book, written by Jie Jack Lirn, is a special monograph on organic names. It attaches a great importance to innovation and application. This book collects more than 300 name recreations and introduces the detailed mechanism process of electron transfer. The new version adds some contents such as the name reactions in the application of synthesis, and it also displays some reference books and documents, including literature review so that readers can have a better understanding of organic reactions. Therefore, this book has enjoyed a wide popularity since 2002 when it was firstly published. This book is the translated version of the 4th edition.
