Bad to the Bone: Crafting Electronics Systems with Beaglebone and BeagleBone Black Steven Barrett, Jason Kridner

This comprehensive book provides detailed materials for both novice and experienced programmers using all BeagleBone variants which host a powerful 32-bit, super-scalar TI Sitara ARM Cortex A8 processor. Authored by Steven F. Barrett and Jason Kridner, a seasoned ECE educator along with the founder of Beagleboard.org, respectively, the work may be used in a wide variety of projects from science fair projects to university courses and senior design projects to first prototypes of very complex systems. Beginners may access the power of the "Bone" through the user-friendly Bonescript examples. Seasoned users may take full advantage of the Bone's power using the underlying Linux-based operating system, a host of feature extension boards (Capes) and a wide variety of Linux community open source libraries. The book contains background theory on system operation coupled with many well-documented, illustrative examples. Examples for novice users are centered on motivational, fun robot projects while advanced projects follow the theme of assistive technology and image processing applications.

Key Features:

- Provides detailed examples for all BeagleBone variants, including the newest "next generation" BeagleBone Black
- BeagleBone is a low cost, open hardware, expandable computer first introduced in november 2011 by beagleboard
- BeagleBone variants, including the original BeagleBone and the new beaglebone black, hosts a powerful 32-bit, super-scalar arM Cortex A8 processor
- BeagleBone is small enough to fit in a small mint tin box
- "Bone" may be used in a wide variety of projects from middle school science fair projects to university courses and senior design projects to first prototypes of very complex systems
- Novice users may access the power of the bone through the user-friendly bonescript environment
- Seasoned users may take full advantage of the Bone's power using the underlying Linux-based operating system
- A host of feature extension boards (Capes) and a wide variety of Linux community open source libraries are available
- The book provides an introduction to this powerful computer and has been designed for a wide variety of users
- The book contains background theory on system operation coupled with many well-documented, illustrative examples
- Examples for novice users are centered on motivational, fun robot projects
- Advanced projects follow the theme of assistive technology and image processing applications

From reader reviews:

Helen Perez:

Information is provisions for people to get better life, information nowadays can get by anyone with everywhere. The information can be a understanding or any news even a huge concern. What people must be consider whenever those information which is from the former life are challenging be find than now is taking seriously which one is suitable to believe or which one typically the resource are convinced. If you receive the unstable resource then you understand it as your main information you will see huge disadvantage for you. All of those possibilities will not happen within you if you take Bad to the Bone: Crafting Electronics Systems with Beaglebone and BeagleBone Black as the daily resource information.

Celina Ziolkowski:

People live in this new moment of lifestyle always try and and must have the free time or they will get wide range of stress from both everyday life and work. So , when we ask do people have spare time, we will say absolutely indeed. People is human not just a robot. Then we inquire again, what kind of activity are you experiencing when the spare time coming to you actually of course your answer can unlimited right. Then ever try this one, reading publications. It can be your alternative inside spending your spare time, the actual book you have read is actually Bad to the Bone: Crafting Electronics Systems with Beaglebone and BeagleBone Black.

Nancy Sobel:

Playing with family in a very park, coming to see the ocean world or hanging out with friends is thing that usually you might have done when you have spare time, and then why you don't try matter that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Bad to the Bone: Crafting Electronics Systems with Beaglebone and BeagleBone Black, you may enjoy both. It is excellent combination right, you still need to miss it? What kind of hangout type is it? Oh can happen its mind hangout people. What? Still don't understand it, oh come on its known as reading friends.

Robert Rooks:

A lot of publication has printed but it differs from the others. You can get it by net on social media. You can choose the most effective book for you, science, comic, novel, or whatever by simply searching from it. It is identified as of book Bad to the Bone: Crafting Electronics Systems with Beaglebone and BeagleBone Black. You'll be able to your knowledge by it. Without leaving behind the printed book, it might add your knowledge and make a person happier to read. It is most essential that, you must aware about reserve. It can bring you from one place to other place.
