## Real Mathematical Analysis (Undergraduate Texts in Mathematics) Charles C. Pugh

Based on an honors course taught by the author at UC Berkeley, this introduction to undergraduate real analysis gives a different emphasis by stressing the importance of pictures and hard problems. Topics include: a natural construction of the real numbers, four-dimensional visualization, basic point-set topology, function spaces, multivariable calculus via differential forms (leading to a simple proof of the Brouwer Fixed Point Theorem), and a pictorial treatment of Lebesgue theory. Over 150 detailed illustrations elucidate abstract concepts and salient points in proofs. The exposition is informal and relaxed, with many helpful asides, examples, some jokes, and occasional comments from mathematicians, such as Littlewood, Dieudonné, and Osserman. This book thus succeeds in being more comprehensive, more comprehensible, and more enjoyable, than standard introductions to analysis.

New to the second edition of *Real Mathematical Analysis* is a presentation of Lebesgue integration done almost entirely using the undergraph approach of Burkill. Payoffs include: concise picture proofs of the Monotone and Dominated Convergence Theorems, a one-line/one-picture proof of Fubini's theorem from Cavalieri's Principle, and, in many cases, the ability to *see* an integral result from measure theory. The presentation includes Vitali's Covering Lemma, density points ? which are rarely treated in books at this level ? and the almost everywhere differentiability of monotone functions. Several new exercises now join a collection of over 500 exercises that pose interesting challenges and introduce special topics to the student keen on mastering this beautiful subject.

### **From reader reviews:**

#### **Judy Turner:**

Why don't make it to become your habit? Right now, try to ready your time to do the important work, like looking for your favorite e-book and reading a guide. Beside you can solve your trouble; you can add your knowledge by the reserve entitled Real Mathematical Analysis (Undergraduate Texts in Mathematics). Try to face the book Real Mathematical Analysis (Undergraduate Texts in Mathematics) as your pal. It means that it can being your friend when you really feel alone and beside associated with course make you smarter than ever before. Yeah, it is very fortunated for you. The book makes you a lot more confidence because you can know everything by the book. So , let's make new experience as well as knowledge with this book.

#### **Marlon Taylor:**

This book untitled Real Mathematical Analysis (Undergraduate Texts in Mathematics) to be one of several books that best seller in this year, here is because when you read this book you can get a lot of benefit onto it. You will easily to buy this book in the book store or you can order it by means of online. The publisher on this book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Smart phone. So there is no reason for your requirements to past this reserve from your list.

#### **Steven Strong:**

Reading a publication can be one of a lot of task that everyone in the world adores. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new facts. When you read a reserve you will get new information mainly because book is one of several ways to share the information or their idea. Second, reading through a book will make anyone more imaginative. When you studying a book especially fictional works book the author will bring you to imagine the story how the personas do it anything. Third, you are able to share your knowledge to others. When you read this Real Mathematical Analysis (Undergraduate Texts in Mathematics), you could tells your family, friends along with soon about yours e-book. Your knowledge can inspire the mediocre, make them reading a publication.

#### **Dorothy Vinson:**

You could spend your free time to read this book this guide. This Real Mathematical Analysis (Undergraduate Texts in Mathematics) is simple bringing you can read it in the area, in the beach, train as well as soon. If you did not get much space to bring typically the printed book, you can buy the e-book. It is make you quicker to read it. You can save the actual book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.
