This is a companion guide to Odenwald's previous book, *The 23rd Cycle: Learning to live with a stormy star*. It is a fast-paced chronicle of over 2000 years of solar storms that have caused not only panic and fear, but have impacted virtually every technology that has been developed during the last 200 years including telegraphs, telephones, radio communications, satellite operations, the electrical power grid and human operations in space. Culled from thousands of newspaper headlines and stories since the early-1800s, this book gives a personal, human insight to the most dramatic 150 'space weather' events of the last few millennia. The Great 1859 Superstorm is recounted from a variety of diary entries and numerous newspaper stories from around the world.
